

ORF QUALITY POLICY

ORF Genetics develops, produces, and sells high-quality growth factors. The products are based on years of biotechnology research by ORF Genetics on plant-based proteins, specifically from barley.

Quality Driven by Science

We are devoted to delivering high-quality products and services by applying robust quality control with the support of our management system. Reporting deviations is a valued and safe behavior and through routine monitoring, review, and feedback, we prevent defects and faults effectively. We are driven by science and make decisions based on data and root cause analysis. We consistently apply best practices in our work and are committed to maintaining and continually improving our management system.

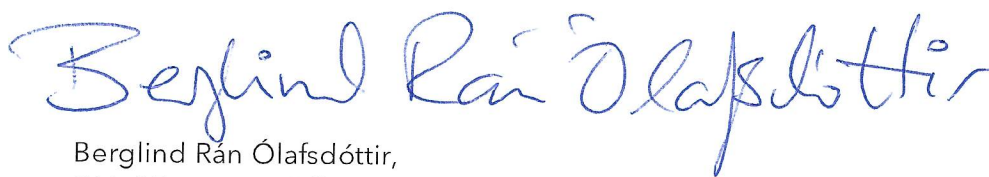

Continuous Improvement

We embrace a culture of continuous improvements and learning and proactively seek opportunities to enhance our processes, systems, and practices. We rely on our process driven approach and team initiatives to seek ongoing optimization and innovation.

Customer Satisfaction

We uphold the highest standards of quality, consistency, and reliability to exceed customer expectations, meet regulatory requirements, and maintain the integrity of our products and services. We practice transparent communication and aim to build long-lasting relationships based on trust and mutual success.
